

HB-15DVCAM/QR Mini DV camera strap is made for lightweight cameras, not “broadcast” cameras. The new Quick-Release feature makes it easy to use the strap when you need it, making the Camera Body Armor, mini Rain Slicker, changes go faster.

Important instructions:

1. Thread the narrow web through the slot on the mini DV cameras as shown. Then thread the end **back through the plastic slide** as indicated by the **red arrow**.

2. **VERY IMPORTANT:** Thread the narrow web **back through the plastic slide** as indicated by the **red arrow**.

3. Connect the black-metal, quick release swivel hook as shown, under the black plastic slide.
